

NOTES:

1. This blowoff is to be used at the ends of cul-de-sacs and at the ends of water lines that may be extended in the future.
2. Blowoff size must be in accordance with AWWA flushing flow rates, but not less than 4-inches for lines larger than 8-inches. (For blowoffs on lines 8-inches and smaller, see *Beaverton Standard Dwg 630*.)
3. Blowoff is not to be located in gutter or ditch.
4. Straddle block shall not be closer than 2 feet from pipe joint.
5. Straddle block shall extend 12-inches minimum into undisturbed soil at bottom and each side of trench.
6. For temporary installations, see *Beaverton Standard Dwg 633*.
